**SPECIALIZED IN ROPE NETTING DEVELOPMENT,
PRODUCTION & CUSTOMIZATION**

GET CLOSE TO YEQIN

Anping Yeqin Knitted Net Co., Ltd was established in 2013 in Anping county, the hometown of wire mesh. It is a high tech enterprise integrating design, R&D, production and sales of rope netting. Over years of development, Yeqin Knitted Net has become a leading rope netting solution expert in agriculture, sports, leisure and construction fields.

Our rope netting features good flexibility, easy to operate and high adaptability to harsh environments. It has excellent high temperature resistance, and is not easy to deform. Besides, it has low extensibility and can be tensioned for a long time; It also has a beautiful appearance and will not rust. At the same time, we actively take part in rope netting material development to improve the elasticity, toughness, stability, environmental protection, safety, reliability and durability of the rope netting.

Construction Nets.....52

Made-to-Order.....54

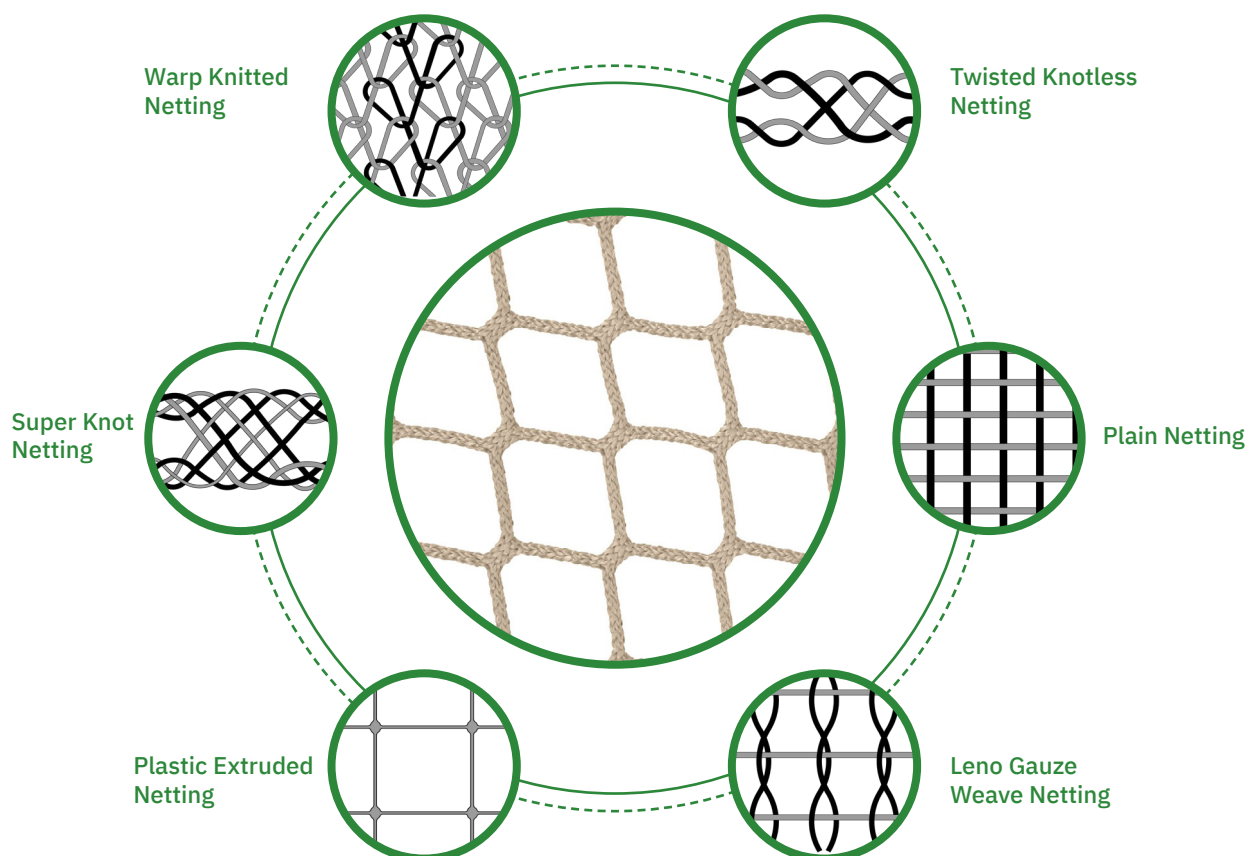

Rope netting is a common, extremely versatile product. It is made of PP, PET, PA and other material strings or strands through the process of braiding, twisting and knotting. It is mainly divided into knotted netting and knotless netting and is mainly used as agricultural hail nets, bird nets, sports goal nets, purse seines, construction safety nets and leisure sun shade sails, etc.

Knotless Netting

Knotless netting is a net fabric without knots made of PE, PP, PA, PET materials through warp knitting, leno weaving and other process.

The most biggest feature of knotless netting is its knotless design, which makes the net surface flatter, softer and lighter. It is suitable for agriculture, fishery and other fields to effectively prevent damage to fish and crops.

In addition, knotless netting is often used as sports goal nets to facilitate the ruling of goals to avoid disputes. It can also be used as sports field fencing to prevent the balls from entering the audience and protect the audience from injury; at the same time, it can also keep the balls from running too far away and facilitate the recovery of the balls.

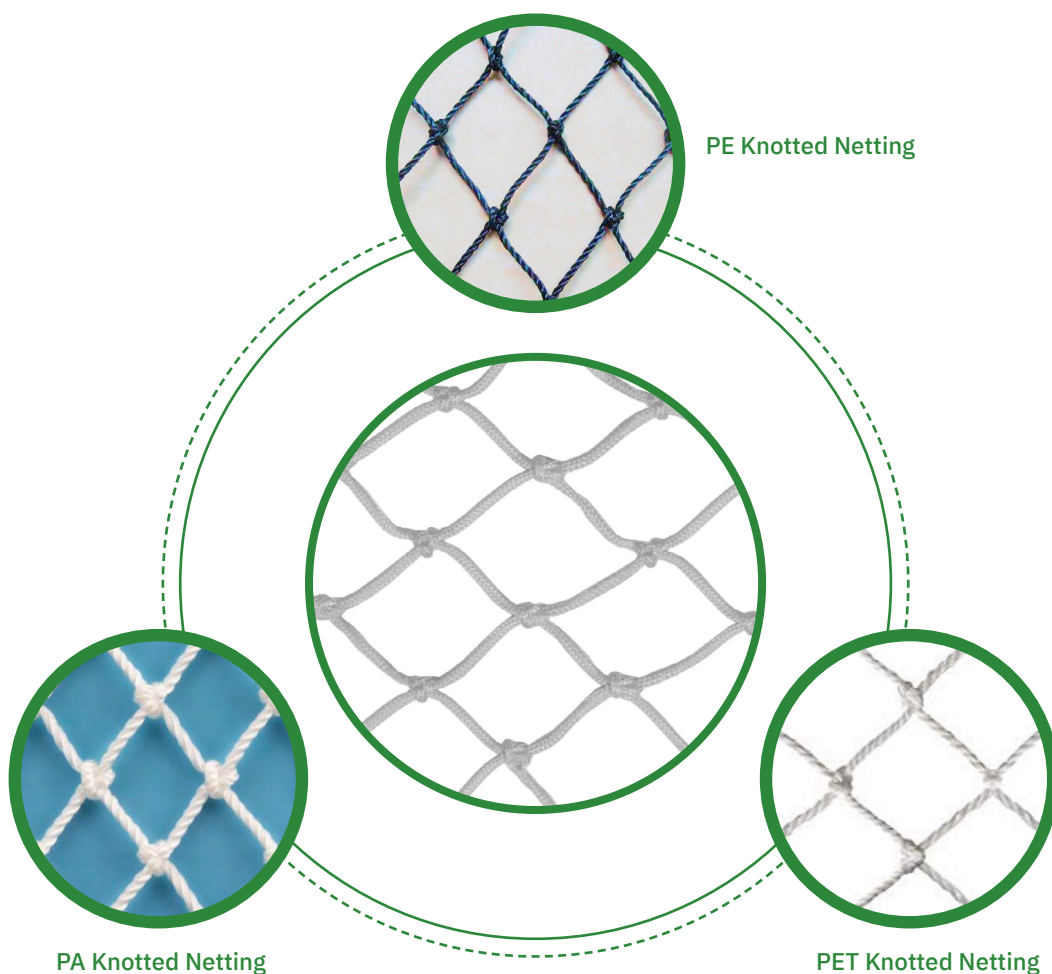

Knotted Netting

Knotted netting is a net fabric made of knotted PE and PA yarns or strands. It generally has large mesh openings, so it also be used as bird nets to protect crops from birds without harming them.

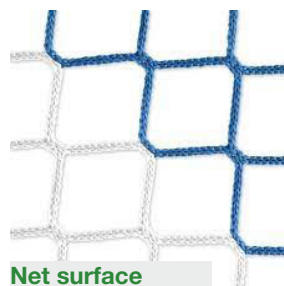

The knotted structure gives the net a high fracture strength and can withstand large impact forces. So it can be used in a variety of high-speed running ball games or heavy ball games, such as baseball batting cage nets, football goal nets, hammer and discus cage nets, etc. Due to its features, it can effectively dissolve the high-intensity impact of the above balls.

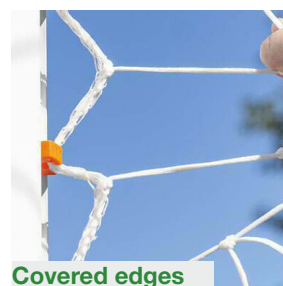

Sports Nets // Football Nets

Our football nets are made of UV-stabilized PE, PP and PET with high wear-resistance and impact resistance.

It can effectively intercept the football in the face of high-speed attacks. It also features good corrosion resistance, sun protection and rain protection, and can adapt to the sunshine and all kinds of bad weather environment and can be used all year round.

Net surface

Covered edges

FEATURES

- Football diameter ranges from 210 mm to 220 mm and 145 mm mesh size can intercept the football easily;
- We also have football goal net with 50 mm mesh size to prevent small objects coming from the spectators and protect the safety of the goalkeeper;
- Our football goal nets have excellent corrosion resistance, wear resistance, UV resistance and rainproof performance and enjoy a long lifespan;
- The rope edges are enveloped to make the net surface have higher tear resistance and impact resistance.

Sports Nets //

Tennis Nets

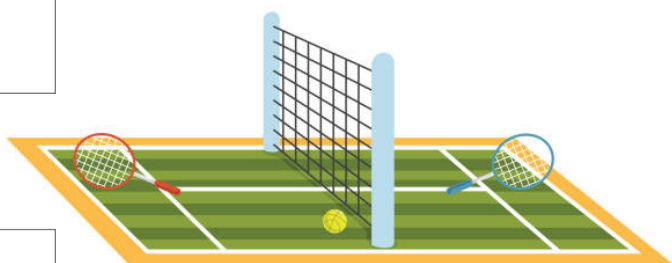

Our tennis nets are made of UV-stabilized PE and PP with high wear resistance, impact resistance, good corrosion resistance and UV resistance.

In addition, its double braided structure offers higher impact resistance and makes it more suitable for all kinds of fields and conditions.

FEATURES

- The double-layer braided net of the first 6 rows offers better protection and higher impact resistance than single-layer braided net;
- The raw materials have excellent anti-UV performance and corrosion resistance, so our tennis net can withstand be exposed to sunlight and not affected by harsh weather conditions;
- The outlines are reinforced to make the net surface more resilient and can effectively prevent the net being worn and damaged, offering a long lifespan;
- PE and PP have excellent wear resistance;
- Center strap ensures that the tennis net is always kept at the same height and offers additional stability. Besides, it also offers additional protection for tennis nets under extreme weather conditions.

Sports Nets // Volleyball Nets

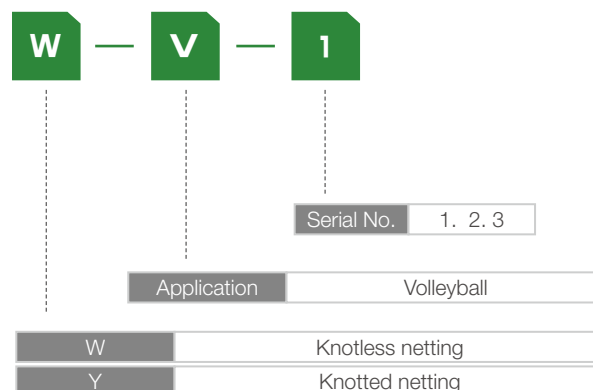

Our volleyball nets are made of PE and PP with excellent wear resistance, good resilience, high tension and great elasticity, and can effectively cushion the impact of volleyball on the net.

Besides, it also has good corrosion resistance and anti-UV stability and can be used outdoors for a long time.

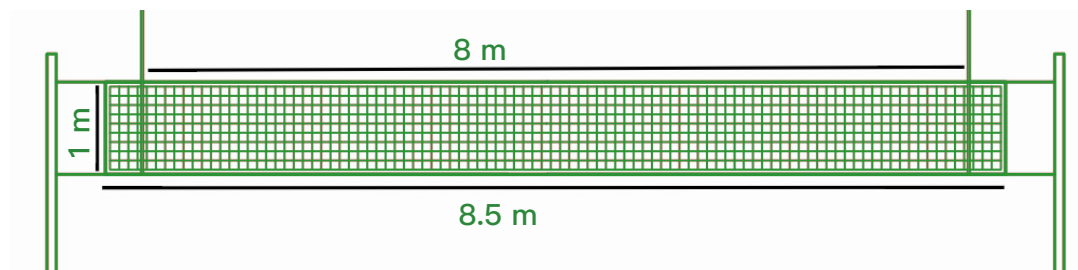

FEATURES

- New PE and PP materials are used for knitting, offering good surface tension, good elasticity, high impact resistance and a long lifespan;
- Great wear resistance and good resilience;
- Machine edge overlocking and not easy to loose thread in the long term use.

Basketball Nets

Our basketball nets are made of high quality nylon and polyester (PET) with excellent corrosion resistance, UV resistance, rainproof and wear resistance, and are suitable for long-term tearing and hanging.

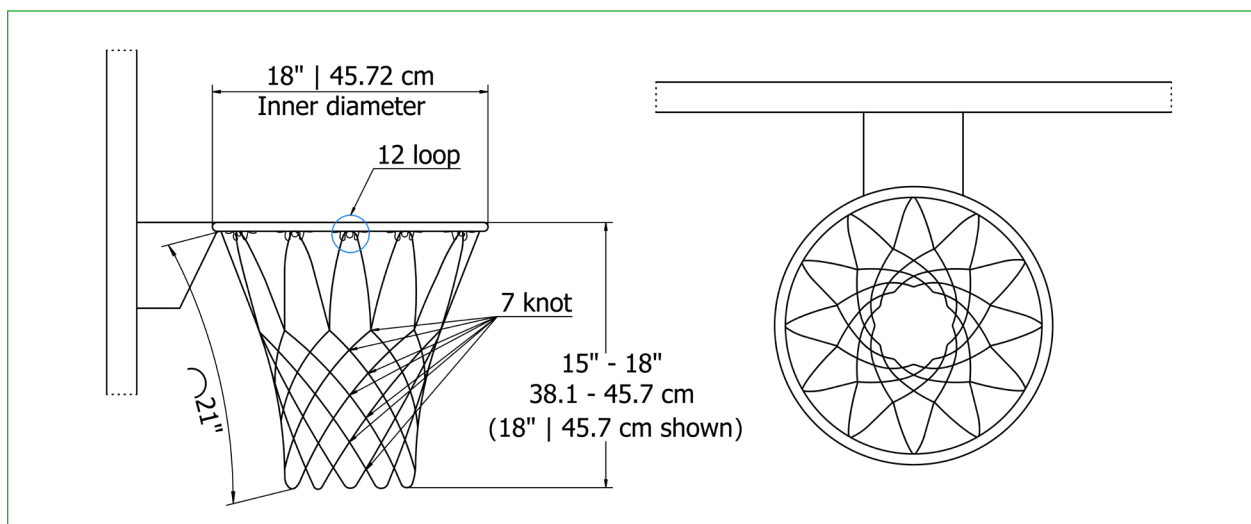

FEATURES

- **Long service life.**

Our basketball nets are made of high quality nylon and (PET) with excellent UV resistance, rainproof and corrosion resistance. They are suitable for both indoor and outdoor basketball hoops and can withstand any type of weather conditions and constant pulling and hanging that comes with regular play.

- **Easy to install.**

12 loops make it easy to install and replace basketball nets on any basketball hoop of standard size, it only takes minutes to finish the installation.

Basketball net 12-loop, 7-knot, 53.34 cm (21 inches) and suitable for all standard model basket hoops.
 Color available: single color: white; double color: white & red; Three colors: white, red and blue for your option.

Sports Nets // Badminton Nets

Our badminton nets are made of UV resistant nylon with good tensile strength and excellent wear resistance. Besides, it has good corrosion resistance and UV resistance and can adapt to all kinds of harsh weather conditions to meet your long-term needs.

FEATURES

- Nylon material makes it have better wear resistance;
- Warp knitted knotless net is beautiful and portable;
- All covered edges, steel cable, nylon tension rope and heavy duty grommet make the badminton net quality assured;
- Standard 1.8 × 1.8 cm mesh size will not catch the badminton on the net, allowing players to play easily;
- 3.1 m, 4.1 m, 5.1 m, 6.1 m and other sizes for your option.

Baseball Cage Nets

Our baseball cage nets are made of UV resistant PA and PE materials with good wear resistance and corrosion resistance. Its knotted structure makes the net surface more elastic.

In addition, the nylon cord edges makes the baseball cage net rigid, durable and easy to install.

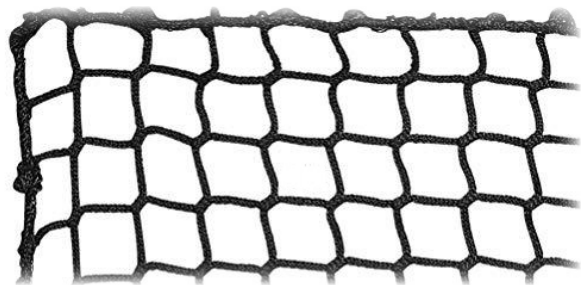

FEATURES

- Nylon and PE material offer good wear resistance and corrosion resistance;
- UV resistant, sun and rain resistant, long service life;
- Rope reinforced edges make the whole net have higher impact resistance, tear resistance and easy to install;
- Knotted structure make the net more elastic and can withstand high speed impact, firm and durable.

Sports Nets // Golf Nets

Our golf nets are made of UV resistant PP, PET, PE and PA materials with good corrosion resistance and wear resistance; The net surface is flat and smooth and has high impact resistance; Besides, the heat treated edges make the net surface firmer, more durable and easy to install.

FEATURES

- 15 mm – 22 mm mesh size (golf size 42.67 mm) can effectively prevent the golf from escaping and avoid the trouble of finding golf;
- Nylon, PE, PP and PET materials are available to give you more options;
- Golf nets have great UV resistance and corrosion resistance;
- The golf net edges are heat treated, which makes it have better wear resistance and higher impact resistance;
- The net surface is flat and soft and can effectively offset the impact of golf at high speed.

Hockey Nets

Our hockey nets are made of PE and PP materials with excellent wear resistance, corrosion resistance, anti-aging performance and exceptional durability.

The net surface is flat and soft and has high impact resistance and can effectively neutralize the hockey ball at high speed. In addition, our product is also added with UV resistant agent and is suitable for both indoors and outdoors.

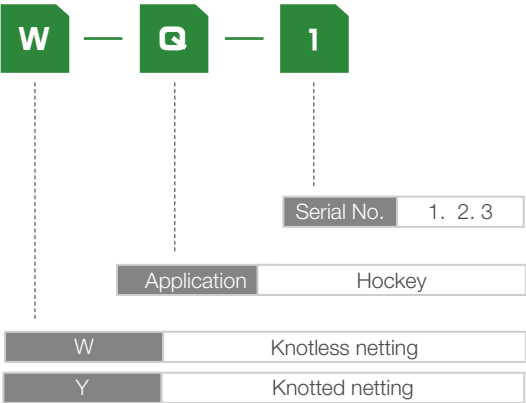

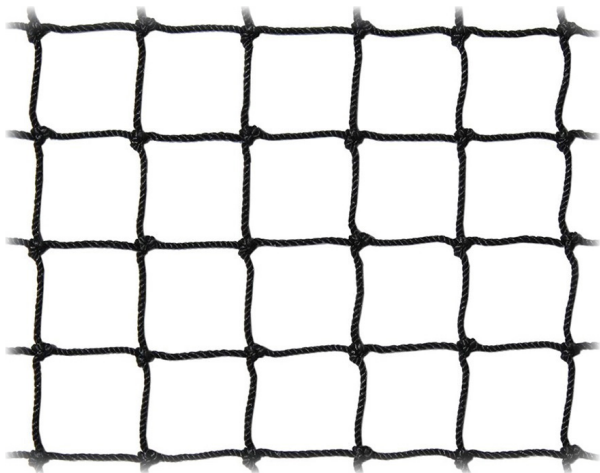

FEATURES

- Soft, flat net surface offers good impact resistance;
- UV resistant and corrosion resistant, suitable for various environments;
- Good wear resistance and exceptional durability;
- Wind and rain proof, anti-aging.

Hammer-Discus Cage Netting

Our hammer-discus cage nets are made of UV-resistant PA and PP materials with good wear resistance, high tensile strength and high impact resistance. Our products meet and even exceed IAAF and NCAA regulations and rules.

FEATURES

- 40 mm – 45 mm mesh size ensures the safety while allowing the wind to pass through and making the net surface more stable;
- Edges are provided with 8 mm rope band to improve the tear resistance and impact resistance of the net surface, making the net surface more solid and durable;
- Our hammer-discus cage net are wear resistant, corrosion resistant, UV resistant, rainproof and durable;
- Made of nylon and PP materials, it is UV resistant, toxic-free and can be used both indoors and outdoors.

Sports Nets //

Sports Perimeter Nets

Our sports perimeter nets are made of PE & PP materials with flat net surface, good tension, not easy to deform and excellent ball impact resistance.

In addition, our products also have good wear resistance, corrosion resistance and easy to install features. The bottom edge lining covers a thin lead sheet to lower the net and ensure the balls will be kept in the net.

FEATURES

- Flat net surface, good tension and can resist all kinds of ball impacts;
- Wear resistant, impact resistant, collision resistant and will not deform under all kinds of ball impacts;
- UV resistant, rainproof and long lifespan;
- Good corrosion resistant, toxic-free and can be used for both indoors and outdoors;
- The net surface is light, soft and edges are provided with bands to make installation easier.

Agricultural Nets // Anti Hail Nets

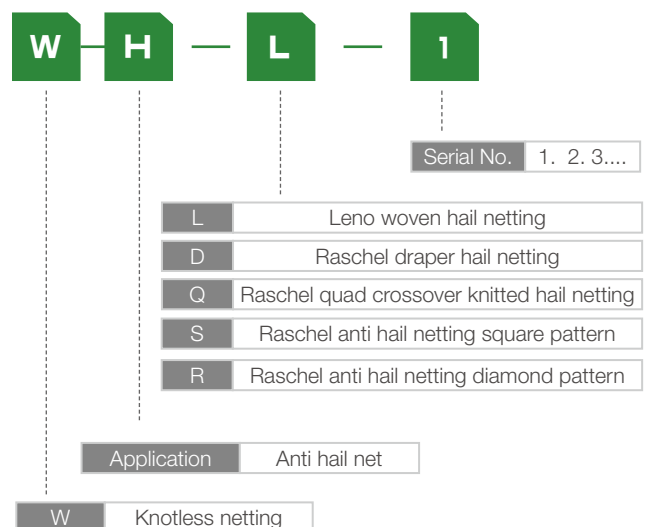

Our anti hail nets are made of HDPE materials with high tear resistance and high impact resistance.

The net surface has good elasticity and can effectively alleviate the impact of hails; The reinforced edges increase the elastic strength of the net, making it firm and durable.

FEATURES

- Oxidation resistant, tear resistant and UV resistant;
- Recyclable material, climate and plants friendly;
- Built-in perforation and lighter weight, making it is easy to install by pulling cords;
- Dense perforations can prevent small size hail from entering;
- Reinforced edges enhance the elastic strength of the net;
- Can resist up to 90% hail and wind.

Agricultural Nets // Anti Bird Nets

Our anti bird nets are made of PE & PA materials with high tear resistance, heat resistance, corrosion resistance, anti-aging and easy to disposal features.

FEATURES

- Wear & tear resistant, high tensile strength;
- Made of High-quality nylon high-temperature dissolved yarns, high and low temperature resistant, long lifespan;
- Provide a moderate shade and create a favourable growing environment for plants;
- UV resistant, corrosion resistant, non-toxic and non-hazardous;
- Easy to install and adjust to desired size to meet various demands;
- Provide maximum crop protection without affecting birds and small animals. It will not interfere with plant growth and make sure these plants will not affected by fog, sunlight and humidity.

Agricultural Nets // Sun Shade Net

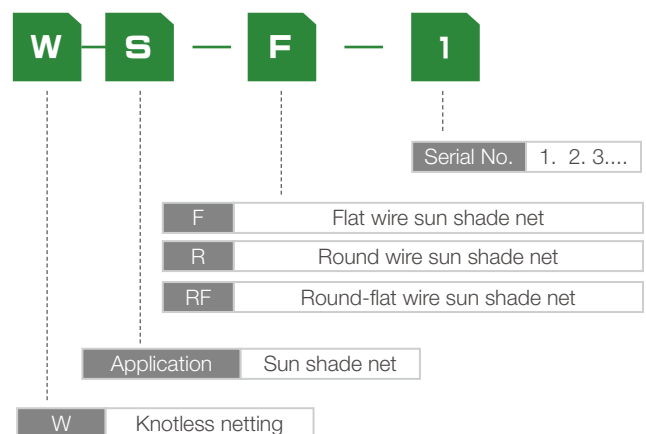

Our sun shade nets are made of UV resistant HDPE with corrosion resistance, moisture-proof, no water absorption and tear resistance features.

It has the functions of blocking light, rain, moisturizing and cooling for plants.

FEATURES

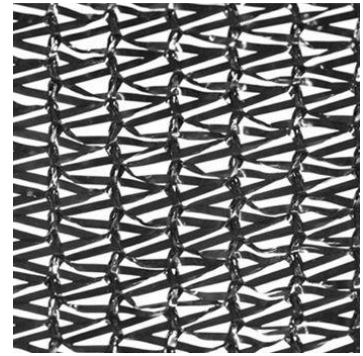

- HDPE, UV resistant;
- Waterproof, mildew and corrosion resistant;
- Reinforced edges offer higher tear resistance;
- 5 years and above life expectancy;
- Rigid, flexible and easy to install.

Flat Wire Sun Shade Net

Sun shade net, all flat wire design, HDPE materials, triangle mesh, warp knitted net.
Color options: black, green, red, blue, white, etc.
Sizes can be customized upon request.

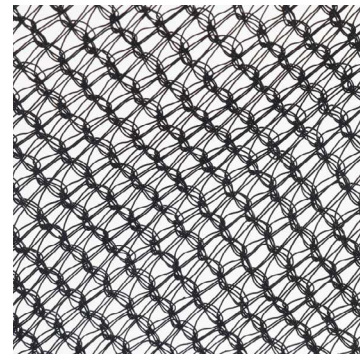

Model	Weight	Shading Rate
WS-F1	100 g/m ²	80%
WS-F2	80 g/m ²	75%
WS-F4	55 g/m ²	50%

Round Wire Sun Shade Net

Sun shade net, all round wire design, HDPE materials, triangle mesh, warp knitted net.
Color options: black, green, red, blue, white, etc.
Sizes can be customized upon request.

Model	Weight	Shading Rate
WS-R1	110 g/m ²	40%
WS-R2	145 g/m ²	60%
WS-R3	160 g/m ²	80%

Round-Flat Wire Sun Shade Net

Sun shade net, round-flat wire design, HDPE materials, triangle mesh, warp knitted net.
Color options: black, green, red, blue, white, etc.
Sizes can be customized upon request.

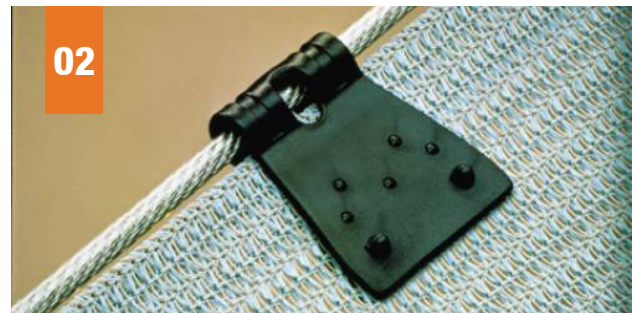

Model	Thread Diameter	Mesh Size
WS-RF1	185 g/m ²	95%

Accessories

Round clip for shade net

Butterfly clip for shade net

Agricultural Nets // Olive Nets

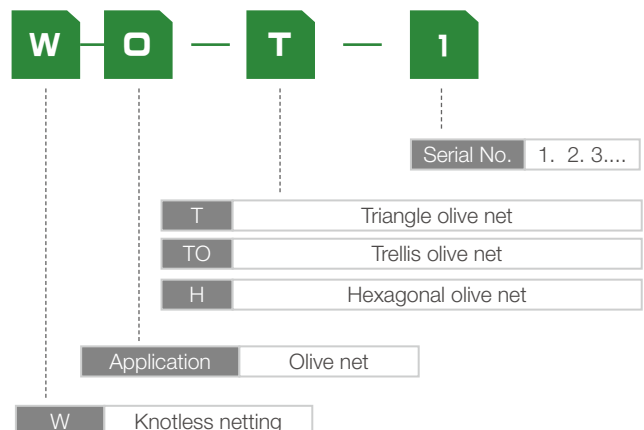

Our olive nets are made of UV resistant HDPE materials with high tear resistance, wear resistance, corrosion resistance, moisture-proof and non-toxic features. It is mainly used to harvest all kinds of small fruits and nuts.

It is both economical and effective in this respect. Our olive nets are usually used in orchards, farms, etc. Our olive nets are widely used in orchards, farms and other places.

FEATURES

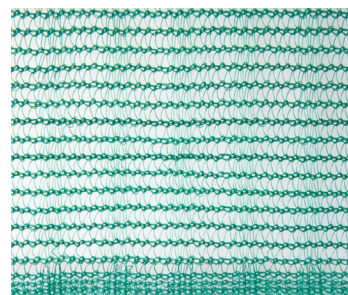

- HDPE material, UV resistant, wear resistant and long lifespan;
- It is non-toxic and complies with existing European food package regulations;
- Waterproof, moisture-proof, mildew resistant.

Triangle Olive Net

Olive net, HDPE materials, triangle mesh, warp knitted net.
Color options: black, green, dark green, sandy, etc.
Sizes can be customized upon request.

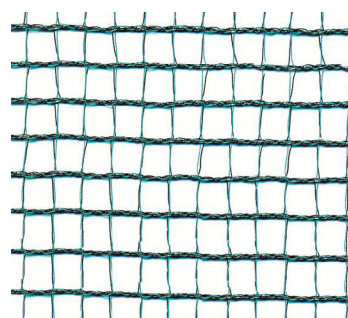

Model	Thread Diameter	Mesh Size
WO-T1	92 g/m ²	1 × 3 mm

Trellis Olive Net

Olive net, HDPE materials, square mesh, warp knitted net.
Color options: black, green, dark green, sandy, etc.
Sizes can be customized upon request.

Model	Weight	Mesh Size
WO-TO2	32 g/m ²	10 × 6 mm
WO-TO3	33 g/m ²	10 × 6 mm
WO-TO4	50 g/m ²	5 × 8 mm
WO-TO5	60 g/m ²	5 × 5 mm

Hexagonal Olive Net

Olive net, HDPE materials, hexagonal mesh, warp knitted net.
Color options: black, green, dark green, sandy, etc.
Sizes can be customized upon request.

Model	Weight	Mesh Size
WO-H1	35 g/m ²	5 × 8 mm
WO-H2	45 g/m ²	5 × 8 mm
WO-H3	55 g/m ²	5 × 8 mm

Agricultural Nets // Plant Climbing Nets

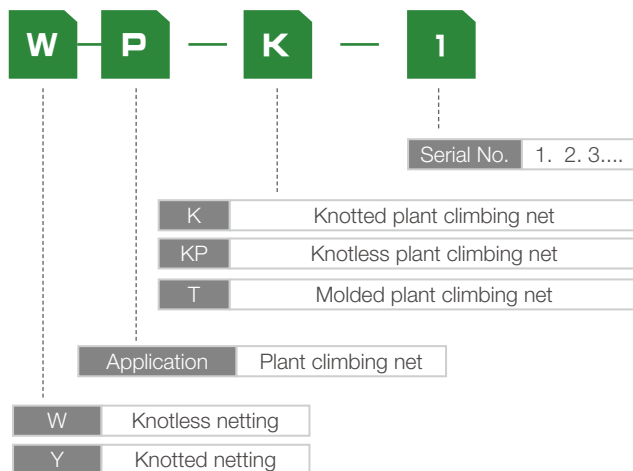

Our plant climbing net are specially designed for vine vegetables and fruits to provide them with climbing support, enlarge their growing space and improve their yield.

Our plant climbing nets are made of UV resistant PE, PP, PA and PET materials, featuring corrosion resistant, wear resistant, non-toxic, anti-aging and long lifespan. They are suitable for vegetable gardens, orchards, gardens, vineyards, etc.

FEATURES

- Prevent the fruits from contacting with the soil, making it less susceptible to disease;
- Easy to cut and install;
- Soft net surface, no sharp edge;
- UV resistant, corrosion resistant, wear resistant, long lifespan.

Knotted Plant Climbing Net

Plant climbing net, HDPE material, knotted netting, diamond mesh.

Color options: black, green, red, white.

It can be customized upon request.

Model	Thread Diameter	Mesh Size
YP-K1	1.6 mm	10 cm × 10 cm
YP-K2	1.6 mm	13 cm × 13 cm
YP-K3	1.6 mm	15 cm × 15 cm
YP-K4	1.6 mm	15 cm × 17 cm
YP-K5	1.6 mm	20 cm × 20 cm

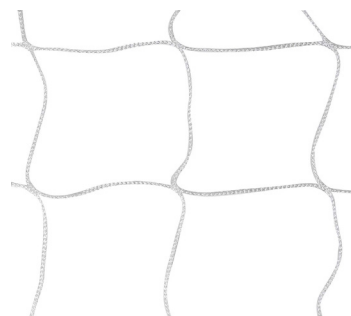

Knotless Plant Climbing Net

Plant climbing net, nylon material, knotless netting, diamond mesh.

Color options: black, green, red, white.

It can be customized upon request.

Model	Thread Diameter	Mesh Size
WP-KP1	1.6 mm	10 cm × 10 cm
WP-KP2	1.6 mm	13 cm × 13 cm
WP-KP3	1.6 mm	15 cm × 15 cm
WP-KP4	1.6 mm	15 cm × 17 cm
WP-KP5	1.6 mm	20 cm × 20 cm

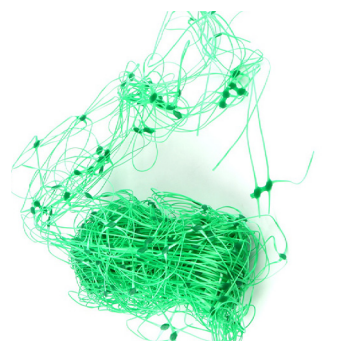

Molded Plant Climbing Net

Plant climbing net, PP, PE & PA available, diamond mesh.

Color options: black, green, red, white.

It can be customized upon request.

Model	Weight	Mesh Size
WP-T1	8 g/m ²	10 cm × 10 cm
WP-T2	8 g/m ²	13 cm × 13 cm
WP-T3	8 g/m ²	15 cm × 15 cm
WP-T4	8 g/m ²	15 cm × 17 cm
WP-T5	8 g/m ²	20 cm × 20 cm

Agricultural Nets //

Bale Hay Net

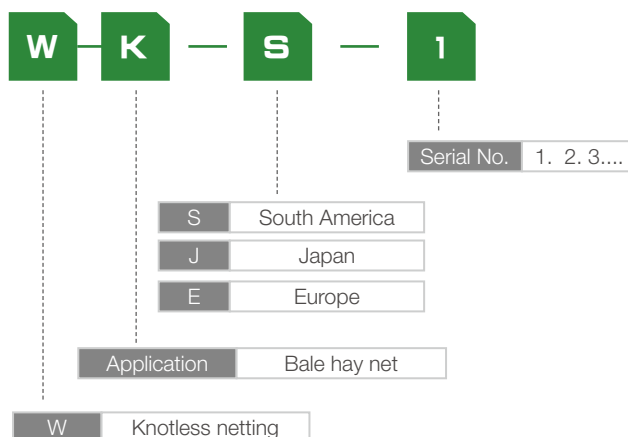

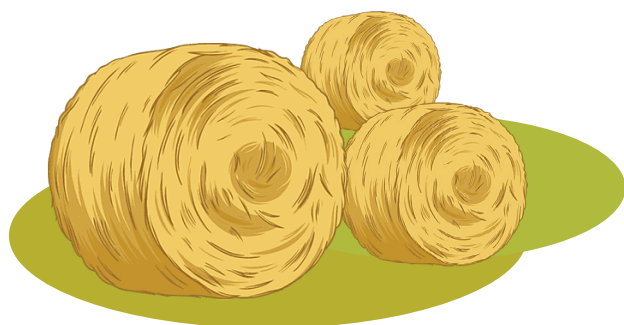

Our bale hay nets are made of high density PE materials with good UV resistance, corrosion resistance, anti-aging and high tear resistance features. It is easy to use, highly efficient and durable and is getting an increasing popularity on the market.

Bale hay nets are suitable for packing hay, straw and dry manure, waste plastics, etc. They are mainly used in farms, grasslands, livestock farms and other places.

FEATURES

- The material is light in weight, easy to use and cost-effective;
- Durable design, can prevent pierce and tear to ensure safe, reliable transportation;
- Good UV resistant and can withstand extreme weather conditions

Bale hay net

Bale hay net, HDPE material, warp knitted net, triangle mesh.

Color options: transparent, white, red, green.

Sizes can be customized upon request.

Agricultural Nets // Horse Hay Net

Our horse hay nets are made of PA, PP and PET materials with excellent UV resistance, wear resistance, corrosion resistance and exceptional durability.

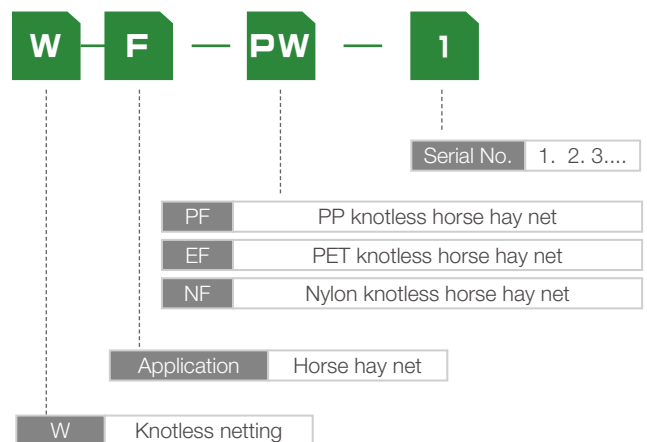

It is suitable for breeding farms, individual horse farms, racecourses, equestrian clubs and similar places.

You may choose or customize the net types and sizes according to your needs.

FEATURES

- The small mesh design helps to avoid hay waste. It also prolongs the horse feeding time and facilitates the horse digestion and absorption to avoid stomach diseases; Besides, it also prevents horse from eating too much and causes horse obesity.
- The net features good wear resistance, nibbling resistance, UV resistance and long service life;
- Knotless design is more friendly to horse gums and mouth.

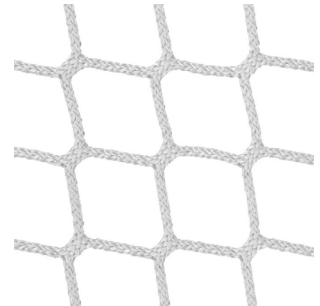

PP Knotless Horse Hay Net

PP knotless horse hay net, HDPE material, knotless, diamond mesh. Color options: black, white, green, blue, etc. Sizes can be customized upon request.

Agricultural Nets //

Cargo Net

Our cargo nets are made of PA, PE, PET and PP materials, featuring good wear & corrosion resistant, UV resistant, waterproof, non-toxic, odorless, safe & reliable, easy installation, etc.

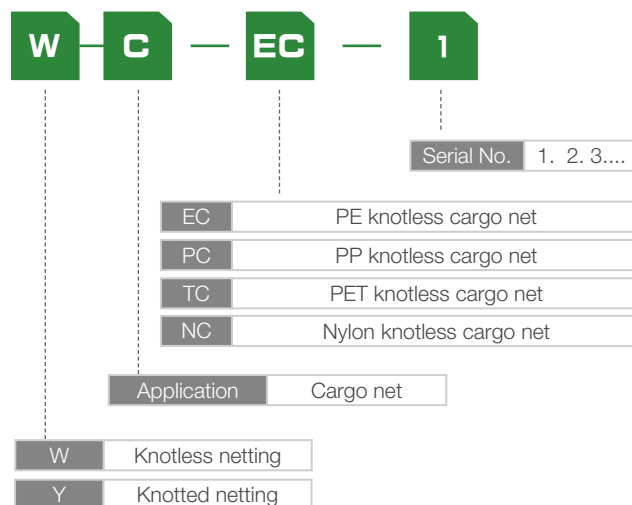

It is suitable for fixing goods on trucks, and pickups and collecting and stabilizing items on SUVs.

You may choose or customize the net types and sizes according to your needs.

FEATURES

- High quality PP, PE, PET and nylon raw materials, waterproof, UV resistant and durable;
- Hooks or ropes can be used for simple and easy installation and fixing;
- Non-toxic material, no pungent odor, you can use it without worry;
- It can be used to secure goods or other items need fixing to keep them safe and stable.

Agricultural Nets // Windbreak Net

Our windbreak nets are made of PE and PET materials, featuring high tear resistant, UV resistant and long service life in outdoors. In addition, the net comes with metal grommets, which makes the installation easy and simple; Its mesh structure reduces the light transmittance and can provide additional privacy protection and shade area.

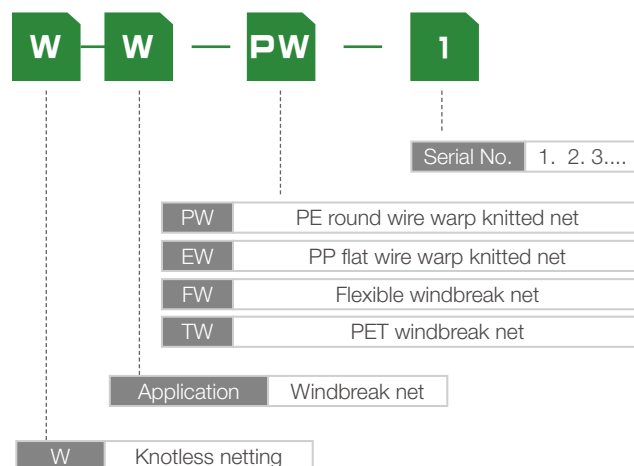

It is suitable for protecting plants, trees or crops from wind, or being used in sports areas like tennis fields as well as coal storage yards, coking plants and other dusty areas for wind reduction

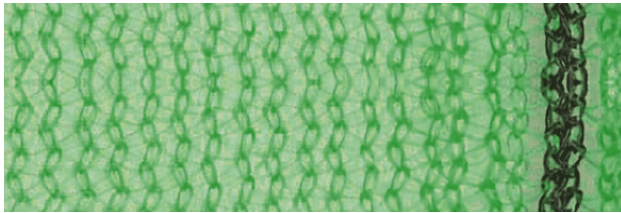

You may choose or customize the net types and sizes according to your needs.

FEATURES

- The net is made of sturdy, UV-treated HDPE, which allows the net to be used in various growing seasons continuously without tearing;
- The net comes with metal grommets, you may use pins, clamps or tie wires for easy installation;
- The mesh structure offers a shade area and can provide additional privacy protection when being placed against fences or existing privacy barrier.

Accessories

Diamond door buckle

4 nails can be used to fix the diamond door buckle on the wall and other solid structures. It can be connected with turnbuckles and screw buckles to secure the sun shade sail, forming tension.

Stainless steel spring buckle

Open the clasp hook and connect with the D shape ring on the sun shade sail and lock.

Plastic expansion screw

It is used to fix diamond door buckle.

Screw buckle

It is used to connect the D shape ring on the sun shade sail and provide tension.

PE rope

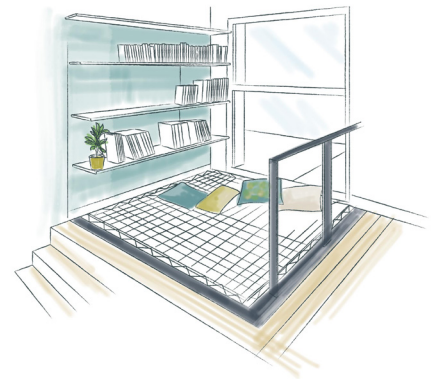

PE rope for sun shade sail, firm and practical, not easy to break.

Leisure Nets // Loft Net

Our loft nets are made of high quality PA, PET and PP materials, featuring non-toxic, UV & corrosion resistant, good wear & tear resistant, high load bearing capacity, reusable and easy cleaning.

It is suitable for hotels, homes, amusement parks, youth hostels, etc. Its fun design creates an unexpected relaxing and resting environment for all kind of places.

FEATURES

- Knotless netting is suitable for horizontal installation, to make it more comfortable while knotted netting is suitable for vertical installation;
- 210 kg/m² load bearing capacity, safer and more reliable;
- High quality PET, nylon and PP raw material, corrosion resistant, UV resistant and durable;
- 6–10 mm tie rope ensures the loft net is safe enough;
- Various colors are available, which makes it more suitable for matching with interior designs.

Construction Nets //

Construction Safety Nets

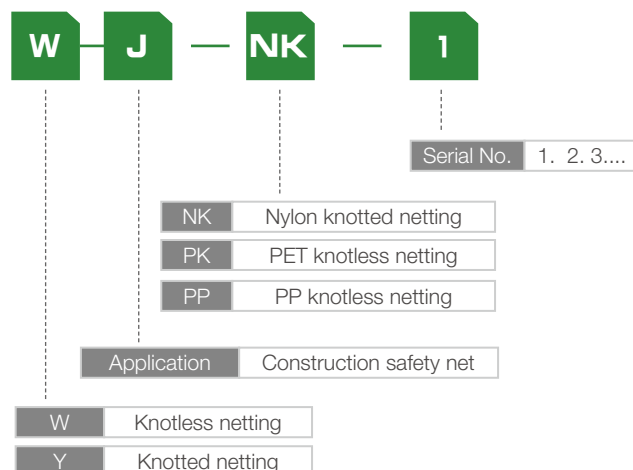

Our construction safety nets are made of PA, PET and PP materials with good wear resistance, corrosion resistance, high breaking strength, good elasticity and can withstand and relieve the impact of heavy loads.

Our products comply with OSHA 1926.105 requirements and EN 1263-1 standards and are suitable for building construction, solar panel installation, new roof construction, roof renovation, roof maintenance, etc.

FEATURES

- Non-toxic material and will not cause damage when in contact with the human mouth and eyes;
- It has excellent weather resistance and UV resistance and is suitable for both indoor and outdoor uses;
- It has high breaking strength and can withstand heavy load impacts;
- The net surface is elastic and has an effective cushioning effect and absorb the impact of falling, thus guaranteeing the safety of construction personnel.

MADE-TO-ORDER

No matter you need anti bird net, anti hail net, construction safety nets, sports net or fishing net, you can always get what you want from Yeqin Knitted Net. We have the full capacity to provide you with best solutions in R&D, design and production aspects. We will communicate with our customers about product details and working conditions and turn their design idea into reality. Finally, we will provide custom rope netting products with reliable functions and perfectly suit to the actual working environments.

Material Customization

PA

Material Customization

High strength, good wear resistant and excellent resistant to deformation and aging, suitable for producing construction safety nets, fishing nets, badminton nets and anti bird nets, etc.

PE

Material Customization

Good wear resistant, high corrosion resistant, flexible and good product performance stability, wide range of applications, for example, football nets, tennis nets, sun shade nets, cage nets and construction safety nets.

PET

Material Customization

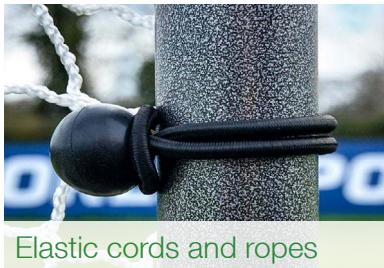

Not easy to absorb water, high breaking strength, high impact resistant and suitable for sports perimeter nets, basketball nets, etc.

PP

Material Customization

Good elasticity, and can be bent repeatedly, good fatigue resistant and suitable for football nets, golf nets, hockey nets, etc.

Finish

Sample-Based Customization

If you have samples, you may send them to us. We have rich experience and expertise in producing construction safety nets, fishing nets and sports nets. In addition, we are familiar with all kinds of rope netting methods and structure and can produce the same and even better rope netting products based on samples.

Our goal is to provide our customers with best custom rope netting solutions within limited time frame.

Contact us, we will provide you with best rope netting solutions and make your own rope netting products.

Co-Design

In R&D and design aspects, we follow the principle of co-design, aiming to develop rope netting products with higher performance and more suitable for practical applications.

We would highly appreciate it if you would like to provide the following information to our R&D team.

- Your existing rope net types and materials;
- Rope netting working environments;
- Your existing problems;
- Rope netting installation drawings.
